

## CONSULTING SOLUTIONS

Best Practice Quality (BPQ) can help you set your CPSC aligned Best Practice Program or other Quality Management System (e.g. ISO9001, ISO13485, AS9100, ISO/TS 16949).

Whether performing a Gap Analysis or starting from the ground up, BPQ can provide the solution.

In addition, BPQ can provide solutions to other problems within your business. We offer consulting, training and auditing in the following areas:

- Quality Management System
- Supplier Quality Assurance
- Licensing Quality Program
- Quality Control Plan
- New Product Development Test Plan / Testing & Certificate Guidance
- Risk Assessment / Hazard Analysis / FMEA
- Gage R&R / Capability (CpK) Studies
- Six Sigma Theory / Statistical Tools
- Lean Basics Training
- Kaizen Lead Workshops
- Audit Checklists
- Anti Retaliation (Whistleblower Protection) & Undue Influence Training
- Recall Ready Toolbox™

## BEST PRACTICE COMPLIANCE PROGRAM

## BEST PRACTICE QUALITY

Best Practice Quality (BPQ) is a Consulting Solutions company that can help your business identify risks within your Quality / Engineering / Manufacturing functional areas and provide solutions which will ultimately improve your bottom line and protect your brand / business organization.

With over 20 years of global experience developing and manufacturing safe, quality products for iconic brand companies, BPQ aims to be your partner in quality systems / risk management and regulatory compliance.

BPQ can analyze, provide road maps, develop one-off or full system solutions to the problems you may be facing today.

Review the next scenarios to see if any may align with your current situation and give BPQ a call to discuss some options that will work for you and your business.

## PROBLEM & SOLUTION SCENARIOS

### Scenario 1:

Your New Product Development team needs a Risk Assessment and /or Development Test Plan to mitigate any product safety hazards.

### Scenario 2:

You recently acquired a new business and need a post acquisition assessment of their Quality and Regulatory functions.

### Scenario 3:

You recently had a product failure in the marketplace and need to develop a Corrective Action Plan and /or to manage the recall activity.

### Scenario 4:

The FDA performed an on-site Inspection and issued you a 483. You need to develop and implement a Corrective Action Plan and file periodic reports.

### Scenario 5:

Your developing a new product which is classified as a Medical Device. You need help developing a regulatory compliance road-map and plan.

### Scenario 6:

You have a new Licensee / Vendor who needs guidance with meeting their contract and /or developing their Quality / Process Control plan.

### Scenario 7:

Your currently understaffed and need someone immediately on-site or remotely to work the backlog of Quality / Reliability Engineering tasks.

## SERVICES

BPQ can develop your Compliance Program, Quality Management System, identify gaps, write SOP's, train staff, perform Quality / Reliability Engineering tasks, lead Kaizens, develop supplier or licensing quality programs / manuals or scorecards, all in an efficient and cost effective manner.

Solutions can be quoted by project, hourly or retained fee. Visit our website or call for more information.
